Structure: 1. Brand system · 2. Global layout · 3. Hero · 4. Proof strip · 5. The Problem · 6. The Fix · 7. 3-Day Trial · 8. 3-Tier Stack · 9. Comparison (Hire vs Rent) · 10. Methodology · 11. Case Studies · 12. FAQ · 13. Final CTA · 14. Footer

1. Brand System

Colors

-  Paper (background) — #FBF6EA
-  Paper soft (card bg) — #F5EFDf
-  Ink (headlines) — #1E1B16
-  Ink body — #4A4237
-  Ink mute — #857A66
-  Accent orange — #E97A2E
-  Marquee black — #0F0D0A
-  Rule (dividers) — #D9CFB8

Typography

- **Headings:** Georgia, "Iowan Old Style", serif. Font weight 500-700.
- **Body:** -apple-system, "Segoe UI", Helvetica, sans-serif. Size 15-16px, line-height 1.55.
- **Accent phrases:** Georgia italic in orange #E97A2E inside serif headlines.
- **Kickers/labels:** uppercase, letter-spacing 0.14em, size 11px, color #E97A2E .
- **Numbers (section 01, 02, 03):** Georgia serif, size 32-40px, color #D9CFB8 .

Buttons

- **Primary:** orange #E97A2E background, white text, pill radius 999px, padding 12px 24px.
- **Secondary:** black #0F0D0A background, cream #FBF6EA text, pill radius.
- **Ghost:** transparent, orange border 1.5px, orange text.

Global feel

Editorial magazine layout. Long-form serif. Cream background with orange accents. Numbered sections with kicker labels. Feels closer to a New Yorker article than a SaaS landing page.

Reference: crackclay.co/campaigns .

2. Global Layout

Top nav (sticky)

- Left: CrackClay logo (small avatar/icon + wordmark serif)
- Center links: GMap 150M Direct Email, Cold Email (Secret Recipe), List Build, Clay Training, Claude Migration
- Right: "Send a Message" (black button) + "Book a Meeting" (orange button)

Container width

Max 1080px, centered, padding 40-60px sides.

3. Hero Section

Kicker pill

OUTBOUND · GTM ENGINEERING (orange border, orange text, pill shape)

Headline (serif, size 42-56px, black + orange italic)

You posted the GTM Engineer role.
Skip the 90-day search.

Sub-headline (serif italic, size 20px, muted)

We're a 2-person team that operates your stack.
Your Clay, your sequencer, your CRM, your enrichment credits.
We bring the workflows, the methodology, the execution.
Nothing from us walks in. Nothing walks out.

CTAs (side by side)

- **Primary orange:** "Start the 3-Day Trial (Free)"
 - **Secondary ghost:** "See the Comparison →"
-

4. Proof Strip (Marquee)

Black horizontal bar, cream text, orange diamond separators. Auto-scroll animation left.

3 GTM engagements running · Workflows on Clay + Claude Code · Zero infrastructure lock-in · 15M+ records delivered · Team of 2 on every account · Anti-retainer pricing

5. The Problem (GTM Engineer Hiring)

Kicker

THE HIRING PROBLEM

Section headline (serif)

Hiring a GTM Engineer is a 9-month bet *with no refund*.

3 cards in a row

Card 1	Card 2	Card 3
01 — THE SEARCH 90-day search process. LinkedIn full of GTM Engineers who look right on paper and fold in month 2.	02 — THE RAMP 3 to 6 months before they ship real pipeline. Meanwhile, competitors are already sending.	03 — THE COST \$120k-\$220k base + equity + tools. \$200k+ year 1 loaded. If it doesn't work out, you lost 9 months.

6. The Fix (Rental Model)

Kicker

THE RENTAL ALTERNATIVE

Section headline

Rent the outcome. *Own the stack*.

3 cards

Card 1	Card 2	Card 3
01 — 7 DAYS TO LIVE First workflow live inside 7 days. No search, no ramp. We already operate stacks like yours.	02 — 2-PERSON TEAM Me and my GTM engineer on every account. Always two people. Redundancy built in.	03 — EVERYTHING IN YOUR ENVIRONMENT Your Clay, your sequencer, your CRM. No infrastructure from us. Nothing to migrate away from.

7. The 3-Day Trial

Kicker

START HERE • FREE

Section headline

The 3-Day Trial: *one workflow, live on your stack*.

Opening paragraph (honesty callout)

A real GTM workflow is 8 to 15 recipes chained together. It needs API access, credit budgets, message angles, A/B testing, personalization tied to signals, and signal-building at the top of the funnel. That's 4 to 8 weeks of build for a full engine, done right.

The 3-day trial doesn't build all of that. It builds one high-value slice, live on your stack, so you see exactly how our team ships and what a full engagement produces.

Two-column split: IN vs NOT IN

What we build in 72 hours	What we don't build in 72 hours
• One Claude Code workflow wired to your Clay • One signal layer of your choice (funding, hiring, tech, or job posts) • One personalization angle in the copy • Output as CSV or Clay push into your sequencer • 3 working sessions (Day 0, Day 2, Day 3)	• Campaign sending (your call, your infrastructure, your timing) • A/B test framework build • Multiple signal layers • CRM integration • Custom copy library • Ongoing management (starts with Tier 2 or 3)

What we need from you

- Clay guest seat
- Your ICP in one paragraph
- Name of your sequencer (no login)
- Claude Code collaborator seat

We do not need: Notion access, CRM logins, Slack channels, team introductions, kickoff decks.

Trial timeline (4 blocks in a horizontal row)

Day 0	Day 1	Day 2	Day 3
45-min kickoff. Scope confirmed in writing before we leave the call.	Build day. No meeting. Work runs on your Clay account.	60-min working session. Live walkthrough. One iteration live.	45-min handover. Files delivered into your workspace. Tier recommendation.

What you walk away with

- The working Claude Code workflow (files + prompts + one-page doc)
- The output list generated during the trial
- A 90-day roadmap
- Zero cost, no obligation, no assets to remove from your environment

CTA button

Orange primary: "Book Day 0 Kickoff"

Capacity note under CTA: "Trial capped at 2 per week. Currently: [X] slots remaining this week."

8. The 3-Tier Stack

Kicker

PRICING

Section headline

Three ways to work together.

3 pricing cards, side by side (card 2 highlighted as "Most Popular")

TIER 1: Trial	TIER 2: Rental (Most Popular)	TIER 3: Ecosystem
FREE 3 days • 1 workflow live • 3 working sessions • Files delivered • 90-day roadmap CTA: Start Trial	\$997/mo Monthly, cancel anytime • 1 workflow per month • Weekly angle testing • Monthly strategy call • Slack access • 2-person team Guarantee: First workflow live in 7 days or month 1 free. CTA: Book Discovery	\$5,000/mo Monthly, cancel anytime • All your Clay workflows migrated • 3+ workflows per month • Signal stack architecture • On-demand iteration • Slack channel, 4-hour response • Weekly strategy call • 2-person team Guarantee: 3+ workflows per month or month 2 free. CTA: Book Discovery

All tiers: work runs on your stack. No mailboxes, no infrastructure, no assets from us. Every file lives in your environment.

9. Comparison: Hire vs Rent

Kicker

THE MATH

Section headline

Hire vs Rent. *Do the math.*

	Hire a GTM Engineer	CrackClay Ecosystem
Time to first workflow live	3-6 months (hire + ramp)	7 days
Loaded cost per month	\$12k-\$18k	\$5k

Team on your account	1 person	2 people
Runs on your stack	Yes	Yes
Infrastructure from vendor	None	None
Lock-in	Salary + equity commitment	Cancel anytime, keep everything
Ramp time	60-90 days	0
If they leave	Rebuild from scratch	We hand over, you keep running
Year 1 total cost	\$200k+	\$60k

10. Methodology (The CrackClay System)

Kicker

METHODOLOGY

Section headline

How the 2-person team ships *on your stack*.

5-step numbered list

1. **Data.** Google Maps extraction for owner-level inboxes that don't exist in Apollo, ZoomInfo, or Cognism. Delivered into your Clay.
2. **Signal layer.** One of funding triggers, hiring signals, tech stack detection, job post monitoring. Wired via MCP into your enrichment credits.
3. **Workflow.** Claude Code + MCP replaces Clay's manual table clicks. Your team gets a Claude Code seat and can prompt directly.
4. **Testing.** Structured angle tests across audience, copy, and personalization. 10+ variants per week under Tier 2 and 3.
5. **Ownership.** Every file, every prompt, every workflow lives in your environment. Nothing on our infrastructure.

11. Case Studies

Kicker

PROOF

Section headline

What we've shipped for teams like yours.

Format: 3 case study cards, each with: client type (anonymized if needed), the workflow built, the outcome. Pull existing case studies from current crackclay.co landing page.

Placeholder structure per card

[Client vertical, e.g., "Series A SaaS · RevOps SaaS"]
Workflow: [What was built]
Outcome: [Quantified result – hours saved, contacts added, workflows migrated]
Timeline: [X days to first ship]

12. FAQ

Kicker

FAQ

Section headline

Everything you'd normally ask on a call.

Accordion format. All questions and answers below.

How does the 3-day trial work?

Day 0 is a 45-minute kickoff where we scope one workflow in writing. Day 1 is build day (no meeting). Day 2 is a 60-minute working session where we demo the live workflow. Day 3 is a 45-minute handover where you receive the files, prompts, and a 90-day roadmap. Total meeting time: 2.5 hours across 3 days.

What tools do you integrate with?

Anything in your existing stack. Clay, Apollo, Instantly, Smartlead, PlusVibe, Salesforce, HubSpot, Slack, Google Workspace. We build on Claude Code + MCP so integration is prompt-driven, not code-heavy.

Do we own the workflows and files?

Yes. Fully. Every workflow file, prompt, and configuration lives in your environment. If we part ways, nothing walks out with us. You keep running everything we built.

Can we cancel anytime?

Yes. Tier 2 and Tier 3 are monthly, no long-term contract. Cancel at any point. All work already delivered stays with you.

What happens if we don't get results?

Tier 2: first workflow live inside 7 days from kickoff or month 1 is free. Tier 3: 3+ workflows per month verified through your project tracking or month 2 is free. The trial itself is free with no obligation.

Do you provide mailboxes or sending infrastructure?

No. This is intentional. We operate your existing stack. You already own the sending infrastructure (mailboxes, domains, sequencer). We bring the workflows, the methodology, the execution. Nothing walks in from our side.

How does your team access our stack?

Minimum required for the trial: Clay guest seat, your ICP definition (one paragraph), name of your sequencer, and a Claude Code collaborator seat. For Tier 2 and 3, we may request read access to your CRM and Slack channel access for async communication. No admin credentials ever needed.

Is this compliant with our SaaS security policies?

Access is scoped and revocable. Everything runs in your environment. We do not export data outside your systems. If you need us to sign an NDA or MSA before kickoff, we do. If you need us to work under your existing security review, we do.

Who is on my account?

Hassan (Founder) and one GTM engineer. Two people, always. Every call has both, every workflow build has both. If one is unavailable, the other covers. That's the redundancy the ICP loses when they hire a single GTM engineer.

How is this different from an AI SDR tool (11x, Artisan, Aurasell)?

AI SDR tools are products you rent to send emails. We are a team you rent to build the workflows behind whatever sending infrastructure you already run. You keep control of the copy, the sending cadence, the reply routing. We build the data + signal + personalization layer on your stack.

13. Final CTA

Section (full-width banner, black background)

Ready to see what a 2-person team ships in 72 hours?

[Book Day 0 Kickoff – orange primary button]

[Send us a Message – black-outline secondary button]

Trial capped at 2 per week. No credit card. No obligation.

14. Footer

Layout: 3 columns

Column 1	Column 2	Column 3
----------	----------	----------

CrackClay GTM engineering on your stack. Two-person team. Nothing from us walks in.	Pages Trial Rental (Tier 2) Ecosystem (Tier 3) Methodology Case Studies FAQ	Contact hassan@crackclay.co crackclay.co/campaigns LinkedIn: [Hassan Tanveer]
---	--	---

© 2026 CrackClay. All work runs on client stacks. No lock-in.

Prompt to Lovable (copy this at the top of your Lovable input)

Build a landing page for CrackClay, a GTM engineering service. Target audience: companies who are hiring for a GTM Engineer role. Positioning: rent a 2-person team to operate your existing GTM stack (Clay, sequencer, CRM, enrichment credits) instead of hiring. Nothing from us walks in, nothing walks out.

Design system: editorial magazine layout with cream background (#FBF6EA), orange accent (#E97A2E), Georgia serif headlines with orange italic accents inside them, sans-serif body copy. Numbered sections with kicker labels. Reference feel: crackclay.co/campaigns (existing site).

Sections in order: Hero, Proof Strip (marquee), The Hiring Problem (3 cards), The Rental Fix (3 cards), The 3-Day Trial (with what's IN and what's NOT IN split), 3-Tier Pricing (3 cards side by side, middle highlighted), Hire vs Rent comparison table, Methodology (5-step numbered list), Case Studies (pull from existing site), FAQ (accordion, 10 items), Final CTA banner, Footer.

Use every section's copy verbatim from the spec below. Do not paraphrase headlines. Do not add sections not listed. Do not add any mention of mailboxes, sending infrastructure, or vendor-owned tools. Everything runs on the client's stack.
