

OUTBOUND INFRASTRUCTURE

Not a formal proposal. *Just what I'd do if we work together.*

Based on our call, Hassan, CrackClay.

100k sends a month ♦ Anti-retainer pricing ♦ 15M+ records delivered ♦ Person-level emails, not info@

01

WHERE YOU'RE AT

You want LinkedIn and cold email as new channels.

You're building the sales platform for insurance reps. Non-captive is the starting ICP. Meta already works cause your people live on IG and TikTok. Now you want two new channels open.

You ran a GTM Engineer ad, going through interviews, this is one of those calls.

02

WHY THIS ANGLE WINS

We're not pitching a policy. We're an *insurance shop*.

The edge is we talk customer needs, not sell one policy. Non-captive space, so we can lay out options. That copy peaks curiosity, opens the door for convo without pressure. Big reply spike comes from that.

03

COMPLIANCE

Cold email in the US is *gray*. *Not illegal*.

I get it, you sit in SaaS compliance yourself. CAN-SPAM is basically sender identity plus unsubscribe plus no misleading subject. We do all that. GDPR isnt on us cause we dont touch Europe.

The FTC angle you mentioned is worth watching but nothing on it is landing in the outbound communities Im in yet. If your internal bar is stricter tell me, well match it.

04

HOW I ACTUALLY RUN THIS

Two month test first. *Speed to signal.*

I dont want to burn your money warming infra for 3 weeks and then find the offer doesnt hit. Skip that whole phase. Campaigns go live in 4-5 days instead of 14-20.

01

INBOXES

Pre-warmed mailboxes, \$1.50 each

250 mailboxes for 100k+ sends a month. Sender domains redirect to stacking.cash. When a lead replies we CC your main mailbox so leads hit your team from day 1. Not stuck in some inbox we control.

02

DATA · MY MOAT

Google Maps scraping, owner inboxes

My brother runs this exact play for an insurance client at 3M sends a month. Data doesnt sit in Apollo, ZoomInfo, Cognism. Thats how we hit owner inboxes direct. Outbound teams stuck on those databases are getting hit by 10 competitors on the same list.

03

AUTOMATION

Claude Code + MCP, not Clay

Clay makes you dependent on one operator and its slow, manual click through tables. Claude Code lets us test tens of angles in parallel. Your team gets a seat, can chat with the system, tweak angles, pull reports.

05

TECH BUDGET · MONTHLY

250 pre-warmed mailboxes	~\$405
PlusVibe · cheapest sequencer	\$97
Instantly · widely used	\$358
Smartlead · highly recommended	\$174
Claude Code seat · you likely have one, just add me	~\$100
Google Maps extraction · on me	included
Total (with Smartlead)	~\$680/mo

All accounts in your name. If we part ways nothing walks with me.

06

MY FEE

\$1,700/mo for the 2 month test.

We start action from week 1. Picture gets clear in a month once the first sequence completes. If we need more sequences we launch them. Covers list building (my moat, hard to do at scale), copy, campaign setup, angle tests, weekly reports, reply routing, all of it.

After 2 months if we found a winner we move to retainer. Rough **\$3,000-5,000/mo** depending on volume. If we didnt find a winner you still keep everything. No lock in.

07

WEEKLY RHYTHM

3-5k contacts added. 20-30k sends. Friday report on what converted and what to test next.

08

TIMELINE

Day 0	You say yes
Day 1-4	Mailboxes provisioned, data pulled, copy drafted
Day 5-7	First campaigns live
Week 2	First angle iteration
Week 4	Second round of tests
Week 8	Winner found → Phase 2 scope, or clean no-go call

09

TEAM BEHIND ME

I work **results approach**, not freelancer hourly bill. We hit deadlines cause I have a team on backend. **One campaign guy, two data guys** extracting for you.

Also owing you from the call. Landing page here crackclay.co/campaigns. A couple client results coming. And Ill add you to the cold email mastermind community I mentioned.

"The harder the contact is to reach, the better the outreach performs."

Alex Hormozi · the principle we're built on

10

NEXT STEP

Say yes. Ill queue mailbox provisioning *this weekend*.

If somethings off tell me and Ill adjust before we start.

Say Yes
