

CrackClay Landing Page Specification

Paste this document into Lovable. Copy is written for CEO, Founder, and CMO readers. Direct voice. No buzzwords.

Structure: 1. Brand system, 2. Global layout, 3. Hero, 4. Proof strip, 5. The Problem, 6. The Fix, 7. 3-Day Trial, 8. 3 Tiers, 9. Hire vs Rent, 10. Methodology, 11. Case Studies, 12. FAQ, 13. Final CTA, 14. Footer.

1. Brand System

Colors

-  Paper (background) #FBF6EA
-  Paper soft (cards) #F5EFDf
-  Ink (headlines) #1E1B16
-  Ink body #4A4237
-  Ink mute #857A66
-  Accent orange #E97A2E
-  Marquee black #0F0D0A
-  Rule (dividers) #D9CFB8

Typography

- Headings: Georgia serif, weight 500 to 700.
- Body: system sans-serif, 15 to 16px, line-height 1.55.
- Accent phrases inside headlines: Georgia italic, orange #E97A2E .
- Kicker labels above headings: uppercase, letter-spacing 0.14em, size 11px, orange.
- Large section numbers (01, 02, 03): Georgia serif, 32-40px, color #D9CFB8 .

Buttons

- Primary: orange background #E97A2E , white text, pill radius 999px, padding 12px 24px.
- Secondary: black background #0F0D0A , cream text, pill radius.
- Ghost: transparent, orange border 1.5px, orange text.

Feel

Editorial magazine. Long-form serif. Cream ground, orange accents. Numbered sections. Reads more like a New Yorker article than a SaaS page. Reference: crackclay.co/campaigns.

2. Global Layout

Sticky top nav

- Left: CrackClay logo (small icon + serif wordmark)
- Center: Trial, Pricing, Methodology, Case Studies, FAQ
- Right: "Book a Call" (black) + "Start Trial" (orange)

Container width

Max 1080px, centered, 40-60px side padding.

3. Hero

Kicker pill

GTM ENGINEERING

Headline (serif, 42-56px, black with orange italic accent)

You posted the GTM Engineer role.
Skip the 90-day search.

Sub-headline (serif italic, 20px, muted)

We run your existing GTM stack for you. Two people on your account.
Your Clay, your sequencer, your CRM, your enrichment credits.
Nothing from us walks in. Nothing walks out.

CTAs

- Primary orange: "Start the 3-Day Trial (Free)"
 - Secondary ghost: "See the Comparison"
-

4. Proof Strip (Marquee)

Black bar, cream text, orange diamond separators, scrolling left.

3 GTM engagements live · Runs on Clay + Claude Code · Zero vendor lock-in
· 15M+ records shipped · Two people on every account · Cancel anytime

5. The Problem

Kicker

THE HIRING PROBLEM

Headline

Hiring a GTM Engineer is a 9-month bet *with no refund*.

3 cards

01. The Search	02. The Ramp	03. The Cost
90 days on LinkedIn. Half the candidates look right on paper and fold in month two. The good ones already work at your competitor.	3 to 6 months before they ship pipeline. Meanwhile the AI SDR debate is moving, your ICP is being pitched, and you have nothing running.	\$120k to \$220k base. Plus equity. Plus tools. Loaded cost year one is \$200k+. If they leave in month 5, you rebuild.

6. The Fix

Kicker

THE RENTAL ALTERNATIVE

Headline

Rent the outcome. *Own the stack*.

3 cards

01. Live in 7 Days	02. Two People	03. Everything Stays Yours
First workflow live inside 7 days from kickoff. No search, no ramp. We already run stacks like yours.	Me and my GTM engineer on every account. Both on every call. No single point of failure.	Your Clay, your sequencer, your CRM. Every file lives in your workspace. If we part ways nothing walks out with us.

7. The 3-Day Trial

Kicker

START HERE • FREE

Headline

The 3-Day Trial. *One workflow, live on your stack*.

Opening callout (the honest paragraph)

A real GTM workflow is 8 to 15 recipes chained together. It needs API access, credit budgets, angle testing, personalization tied to signals, and signal building at the top of the funnel. That

is 4 to 8 weeks of work done right.

The trial does not build all of that. It builds one high-value slice, live on your stack, so you can judge how our team ships before you commit to anything.

Two-column split: IN vs NOT IN

What we build in 72 hours	What we do not build in 72 hours
• One Claude Code workflow wired to your Clay • One signal layer of your choice (funding, hiring, tech stack, or job posts) • One personalization angle in the copy • Output as CSV or Clay push into your sequencer • 3 working sessions with you (Day 0, Day 2, Day 3)	• Campaign sending (your call, your infrastructure, your timing) • A/B test framework build • Multiple signal layers • CRM integration • Copy library • Ongoing management (that starts with Tier 2 or 3)

What we need from you

- Clay guest seat
- Your ICP in one paragraph
- Name of your sequencer (no login required)
- Claude Code collaborator seat

What we do not need: Notion access, CRM logins, Slack channels, team introductions, kickoff decks.

Trial timeline (4 blocks in a row)

Day 0	Day 1	Day 2	Day 3
45-min kickoff. We agree scope in writing before the call ends.	Build day. No meeting. Work runs on your Clay.	60-min working session. Live walkthrough. One live change.	45-min handover. Files delivered into your workspace. Tier recommendation.

What you walk away with

- Working Claude Code workflow (files + prompts + one-page doc)
- Output list generated during the trial
- 90-day roadmap
- Zero cost, no obligation, nothing to remove from your systems

CTA

Orange primary: "Book Day 0 Kickoff"

Trial capped at 2 per week so we do not overpromise. Slots refresh Monday.

8. The 3 Tiers

Kicker

PRICING

Headline

Three ways to work together.

3 cards side by side (middle card highlighted "Most Popular")

TIER 1: Trial	TIER 2: Rental (Most Popular)	TIER 3: Full Migration
FREE 3 days One workflow built and delivered on your stack. 3 working sessions with the team. 90-day roadmap. You keep the files. CTA: Start Trial	\$997/mo Monthly, cancel anytime One new workflow per month. Weekly angle testing. Monthly strategy call. Slack access. Two people on every session. Guarantee: first workflow live in 7 days or month 1 refunded. CTA: Book Discovery	\$5,000/mo Monthly, cancel anytime All your Clay workflows migrated to Claude Code. 3+ new workflows per month. Signal stack built. On-demand iteration. Slack channel, 4-hour response. Two people on every session. Guarantee: 3+ workflows shipped per month or month 2 refunded. CTA: Book Discovery

Every tier runs on your stack. No mailboxes from us. No sending infrastructure from us. No proprietary tools we own. Every file lives in your workspace.

9. Hire vs Rent

Kicker

THE MATH

Headline

Hire versus rent. *Do the math.*

	Hire a GTM Engineer	CrackClay Full Migration
Time to first workflow live	3 to 6 months	7 days
Loaded cost per month	\$12k to \$18k	\$5k
People on your account	1	2
Runs on your stack	Yes	Yes
Infrastructure from vendor	None	None
Contract lock-in	Salary and equity	Cancel anytime
Ramp time	60 to 90 days	0
If they leave	You rebuild	You keep running

Year one total cost	\$200k+	\$60k
---------------------	---------	-------

10. Methodology

Kicker

HOW WE SHIP

Headline

Five-step build. *On your stack.*

5-step list

1. **Data.** Google Maps extraction for owner-level inboxes that do not sit in Apollo, ZoomInfo, or Cognism. Delivered into your Clay.
2. **Signal layer.** One of funding triggers, hiring signals, tech stack detection, or job post monitoring. Wired via MCP into your enrichment credits.
3. **Workflow.** Claude Code + MCP replaces Clay's manual table clicks. Your team gets a Claude Code seat and can prompt the system directly.
4. **Testing.** Structured angle tests across audience, copy, and personalization. 10+ variants per week under Tier 2 and 3.
5. **Ownership.** Every file, prompt, and workflow lives in your workspace. Nothing on our side.

11. Case Studies

Kicker

PROOF

Headline

What we have shipped for teams like yours.

Pull the existing case studies from crackclay.co/campaigns. Layout: 3 cards, each with client type, workflow built, quantified outcome, timeline to first ship.

Card structure

[Vertical, e.g. "Series A SaaS · RevOps"]
 Workflow: [what was built]
 Outcome: [quantified: hours saved, contacts added, workflows migrated]
 Timeline: [X days to first ship]

12. FAQ

Kicker

FAQ

Headline

Everything you would ask on a call.

Accordion format. 10 questions below.

How does the trial work?

Day 0 is a 45-min kickoff where we agree scope in writing. Day 1 is build day, no meeting. Day 2 is a 60-min working session with a live demo. Day 3 is a 45-min handover with files and a 90-day roadmap. Total meeting time across 3 days: 2.5 hours.

What tools do you work with?

Anything in your existing stack. Clay, Apollo, Instantly, Smartlead, PlusVibe, Salesforce, HubSpot, Slack. Everything is built on Claude Code + MCP so integration is prompt-driven, not code-heavy.

Do we own the workflows and files?

Yes. Every workflow file, every prompt, every configuration lives in your workspace. If we part ways nothing walks out with us. You keep running.

Can we cancel anytime?

Yes. Tier 2 and Tier 3 are monthly with no long-term contract. Cancel at any point. Everything already delivered stays with you.

What happens if we do not get results?

Tier 2: first workflow live in 7 days or month 1 refunded. Tier 3: 3+ workflows shipped per month verified through your project tracking or month 2 refunded. The trial is free with no obligation.

Do you provide mailboxes or sending infrastructure?

No. This is deliberate. You already own the sending stack. We operate it, we build the workflows behind it, we do not layer our infrastructure on top of yours.

How does your team access our stack?

For the trial: Clay guest seat, ICP paragraph, sequencer name, Claude Code collaborator seat. For Tier 2 and 3: read access to your CRM and a Slack channel for async. No admin credentials ever needed.

Is this compliant with our security review?

Access is scoped and revocable. We do not export data outside your systems. If you need us to sign an NDA or MSA before kickoff, we sign. If you need us to work under your security review, we work under it.

Who is on my account?

Hassan (Founder) and one GTM engineer. Two people, always. Every call has both. Every workflow build has both. If one is unavailable the other covers.

How is this different from an AI SDR product like 11x or Artisan?

AI SDR products are software you rent to send emails on their infrastructure. We are a team you rent to build the data, signal, and personalization layer behind whatever sending infrastructure you already run. You keep control of copy, cadence, and reply routing.

13. Final CTA

Full-width banner, black background

Ready to see what a 2-person team ships in 72 hours?

[Book Day 0 Kickoff] (orange primary)
[Book a Call] (black outline secondary)

Trial capped at 2 per week. No credit card. No obligation.

14. Footer

Column 1	Column 2	Column 3
CrackClay GTM engineering on your stack. Two people on every account. Nothing from us walks in.	Pages Trial Rental (Tier 2) Full Migration (Tier 3) Methodology Case Studies FAQ	Contact hassan@crackclay.co crackclay.co LinkedIn: Hassan Tanveer

Prompt to Lovable (paste at the top of your Lovable input)

Build a landing page for CrackClay. Target reader: CEO, Founder, or CMO at a SaaS company that just posted a GTM Engineer role. Positioning: they can rent a 2-person team to operate their existing GTM stack (Clay, sequencer, CRM, enrichment credits) instead of hiring one full-time engineer. Nothing from us walks in. Nothing walks out.

Design: editorial magazine layout, cream background #FBF6EA , orange accent #E97A2E ,

Georgia serif headlines with orange italic accents inside them, sans-serif body copy.
Numbered sections with orange kicker labels. Reference: crackclay.co/campaigns.

Section order: Hero, Proof Strip (scrolling marquee), The Hiring Problem (3 cards), The Rental Fix (3 cards), The 3-Day Trial (with IN vs NOT IN split and 4-block timeline), 3-Tier Pricing (side by side, middle highlighted), Hire vs Rent comparison table, Methodology (5-step numbered list), Case Studies, FAQ (accordion, 10 items), Final CTA banner, Footer.

Voice rules: written for CEO, Founder, CMO. Direct, numbers first. No em dashes. No buzzwords (avoid: leverage, unlock, seamless, synergy, robust, streamline, empower, comprehensive, holistic, enterprise-grade, transform, elevate, accelerate, orchestrate, value-add, solution). No mention of mailboxes, sending infrastructure, or vendor-owned tools. Every reference to work runs on the client's stack.

Use every headline and body block from the spec verbatim. Do not paraphrase.
